

TEAM AGREEMENT - CARE MALAWI

Our team recognizes that over the course of the year, we will be responsible for completing and producing the following outputs by their assigned dates:*

1. Ready for Scale Assessment [See example [here](#)]
2. Priority Action Plan for Scale [See example [here](#)]
3. Business Model Canvas [See example [here](#)]
4. Pitch [See example [here](#)]
5. Documentation of the core model of our innovation [See example [here](#)]
6. Outputs related to elective labs

Our team agrees to bring the following mindsets to the program:

- We believe we are co-creators! The accelerator is an experiment and we recognize our input is vital for building a robust and valuable program.
- We recognize there will be some bumps in the road. We understand that there may be changes to the program as we learn what's working and what doesn't. We're excited to adapt and iterate as we learn.
- We're curious. We're interested in figuring out why innovation takes a long time to scale and we want to contribute to the learning and thinking on how CARE can take innovations to scale in a shorter time frame.

We understand that if we do not meet our commitments, we may not be invited to attend the boot camp and pitch event in Atlanta and this may constitute grounds for dropping us from the program.
